

MEDIA ALERT

REPORT A HAZARD WEBSITE OPERATIONAL

In an Australian first, Goulburn Mulwaree, Wingecarribee Shire and Wollondilly Councils have worked together to develop an online hazard reporting website to increase road safety.

www.reportahazard.com.au

The website was developed to make it much easier and more convenient for people to let Councils know about hazards on the roads, pathways or cycleways. Hazards like missing signs, potholes, pavers that have lifted and so on can all be reported on the site and there is a different hazard reporting form for cyclists, motorcyclists, pedestrians or drivers of cars and trucks. Each form offers a list of appropriate option boxes to tick, which makes completing the form very quick and easy for anyone to use. As soon as the problem is noticed you can go online to complete the hazard reporting form - 24hours and 7 days a week.

There could be many road or pathway hazards, which community members have seen that may not yet have been noticed by a Council or the RTA. If these hazards are not reported there may be the potential for a crash or injury.

The website has been designed so any Council in NSW can participate.

The project is funded by the RTA as part of the Local Government Road Safety Program

For more information:

Charmaine Cooper, Road Safety Officer, Goulburn Mulwaree Council M: 0409 986 691 P: 4823 4510

Kim Davis, Road Safety Officer, Wingecarribee Shire Council M: 0408 627 498 P: 4868 0708

How does Report a Hazard work?

Simply log on to www.reportahazard.com.au.

Complete the information requested in the appropriate hazard report. The report will be automatically forwarded to the relevant road authority for inspection and you will receive an acknowledgement email message, which contains a reference number for further enquiries.

Once a hazard is reported it is placed into an Action Request system.
